

# MOTOR VEHICLE ACCIDENT!

## HOW TO HELP YOUR PET IF THEY HAVE BEEN INJURED IN A MOTOR VEHICLE ACCIDENT

**24hour**  
EXCELLENCE IN VETERINARY CARE

- Any animal that has been hit by a car should be assessed by a vet as soon as possible.
- Take care when moving them as they may be in pain and are more likely to bite.
- If they are unable to stand, use a towel or car seat hammock to move them.
- Trauma may worsen over the first 48 hours after the injury. Adrenaline may mask the initial signs of pain and even internal bleeding or a collapsed lung, so even if your pet looks fine, a comprehensive examination is always necessary

## FROM OUR SHOP
