

Use only as directed.

May be used on kittens from 8 weeks of age and rabbits from 10 weeks of age.

Dosage: For kittens, cats and rabbits up to 4 kg, use one 0,4 ml tube once a month. Rabbits weighing more than 4 kg should receive 2 tubes of 0,4 ml or 1 tube of 0,8 ml. For cats over 4 kg, use one 0,8 ml tube once a month.

Hold the applicator tube in an upright position. Pull cap off the tube. Turn the cap around and place the other end of the cap back on the tube. Twist cap to break the seal, then remove the cap from the tube. (See diagram below.)

For easy application, the animal should be standing. **Administration to cats:** Part the hair on the back of the neck at the base of the cat's skull until the skin is visible. Place the tip of the tube on the skin and squeeze out the contents thoroughly to apply the solution directly onto the skin.

Administration to rabbits: Part the hair on the rabbit's neck at the base of the skull until the skin is visible. Place the tip of the tube on the skin and squeeze firmly several times to empty the contents onto the skin.
