

Directions for use: Use only as directed.

Apply to intact skin only.

All tubes should be used within 18 months after opening the foil pouch or before the expiry date on tube, whichever is shorter.

Dosage:

Use one 0,4 ml tube per dog weighing over 1,5 kg and up to 4 kg.

Use one 1,0 ml tube per dog weighing over 4 kg and up to 10 kg.

Use one 2,5 ml tube per dog weighing over 10 kg and up to 25 kg.

Use one 4,0 ml tube per dog weighing 25 kg and up to 40 kg.

For dogs >40 kg the appropriate combination of tubes should be used.

Hold the applicator tube in an upright position, twist and pull off cap and use the opposite end of the cap to break the seal. For easy application, the animal should be standing.

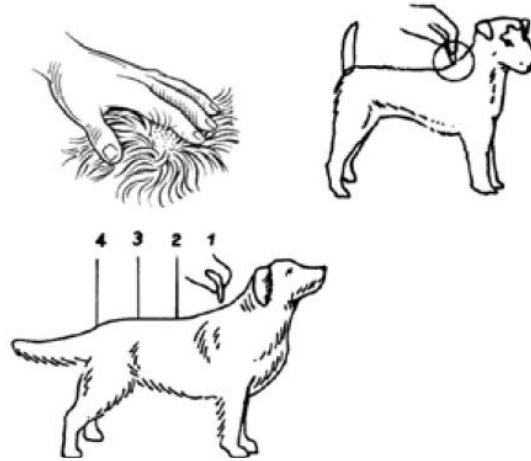

Dogs and puppies over 1,5 kg and up to 4 kg: The product should be applied evenly to 2 spots on the top of the back from the shoulder to the base of the tail.

Dogs and puppies over 4 kg and up to 10 kg: The product should be applied evenly to 2-3 spots on the top of the back from the shoulder to the base of the tail.

Dogs over 10 kg and up to 25 kg: The product should be applied evenly to 4 spots on the top of the back from the shoulder to the base of the tail.

Dogs over 25 kg and up to 40 kg: The product should be applied evenly to 4 spots on the top of the back from the shoulder to the base of the tail.

Part the hair, place the tip of the tube on the skin and squeeze firmly several times to empty the contents directly onto the skin. Do not get this product in your pet's eyes or mouth.

Swimming and shampooing: The product remains effective if the animal becomes wet. If a dog needs to be bathed, this should be done before product application. Wait until the dog is completely dry before applying **Advantix®**. This could take up to a day, depending on the hair-coat

density and length. Frequent shampooing or daily swimming may have an effect on the duration of the efficacy of the product.
