

USE ONLY AS DIRECTED

- Administer tablets at or around the time of feeding for maximum effectiveness.
- It can be mixed with food or given by hand since it is very palatable.
- For optimal control of tick and flea infestation, **Bravecto**® should be administered at a 12-week interval.
- **Bravecto**® can be administered all year round.
- The chew tablets should not be broken or divided.
- Within each weight range a whole tablet must be used.

DOSAGE

Weight (kg)	Tablet size
2,0 - 4,5	112,5 mg for miniature dogs
> 4,5 - 10	250 mg for small dogs
> 10 - 20	500 mg for medium dogs
> 20 - 40	1 000 mg for large dogs
> 40 - 56	1 400 mg for extra-large dogs

For dogs weighing more than 56 kg, use a combination of 2 tablets that most closely matches the body weight.
